Easy to create Photobooks

Image Organizer enables incredibly easy ordering and production of Photobooks

Automatically selects optimal photos based on face profile, brightness, focus and color, and lays them out. It simplifies the complex procedures, eliminating the customer's reluctance to order Photobooks.

Automatic Photobook recommendation

Shows a virtual Photobook automatically created from photographic data submitted by the customer who is ordering photo prints, to attract additional Photobook orders.

Flexibility to create various types of templates

Template editing is possible, allowing creation of templates which meet the shop's needs.
