THIS IS WHAT OUR USERS THINK:

NICOLA MORGAN AND THE ADMIN TEAM

CWM has allowed the booking team to work flexibly across several hospital sites improving the service we offer people. Patients are easily targeted to the appropriate clinician, which optimises list utilisation. Scheduling reports allow us to monitor productivity within the team and easily identify any training requirements.

JEFF TURNER, GASTROENTEROLOGY DIRECTORATE CLINICAL DIRECTOR

CWM is a user friendly, state of the art reporting system. It allows me to view all scheduled sessions, patient referral priority and medical alert flags. As well as pushing data to the National Endoscopy Database (NED), I can also generate operator and unit performance reports within seconds. This has significantly improved efficiency within our units.

BETH JONES AND SALLYANN GEORGE, ENDOSCOPY UNIT MANAGERS

This new system is very intuitive with minimum training needed to use it. The layout makes it easy to see if lists are full or have space for inpatient procedures. Having the scheduling and reporting systems combined has really improved patient flow in the department.

Value from Innovation

IMPROVE YOUR **EFFICIENCY**

Fujifilm's Synapse Clinical Workflow Manager ES (CWM ES) is one of the most advanced endoscopy information systems in the market today and helps you to meet the needs of an evolving endoscopy market.

THE **SYNAPSE CWM ES** OFFERS YOU EVERYTHING YOU MAY EXPECT FROM A STATE-OF-THE ART WORKFLOW SYSTEM:

It is a complete solution, supporting you with every step of the endoscopy workflow, from planning over patient admission, clinical assessment, reporting and scope management. You can easily access it from various locations, with any device (mobile phone, tablet, desktop computer) and it is available in multiple languages to meet the requirements of an international workplace. Its intuitive user-interface makes it easy to use. As an open solution, you can use Synapse CWM ES with any endoscopy brand that is used in your workplace. Let Synapse CWM ES help you to organise your daily challenges with managing the evolving endoscopy environment - so that you can concentrate more on your patients and provide the best possible care.
