SIMPLE AND QUICK STRETCHER BARS FOR CANVAS FRAMING

**LFP**  
print it **large!**

Wunderbars is a revolutionary framing system for creating canvas wraps. These easy to use bars provide a quick and simple solution for stretching canvas without the need for specialist tools or skills. The unique design of the bars, ensure that regardless of the hanging environment the canvases will remain under constant tension, eliminating sagging and rippling.

Wunderbars constant tension stretcher bars are easier to construct and stretch than traditional stretchers. Each bar is precision machined so that when the frame is put together it is square eliminating the need to constantly keep tapping it to keep it square before stretching.

Unlike other stretching systems there is no need for expensive machinery or devices, the only tool needed is a staple gun. Wunderbars' unique self tensioning corner blocks ensure that, there's no more sagging canvas, it always stays tight and will contract and expand to the room's temperature and humidity.

The wood used for Wunderbars are Tulip wood and Scandinavian Pine from sustainable sources, which are FSC and PEFC certified.

More information on the Wunderbars can be found on:

<http://www.wunderbars.com>

The Wunderbars are unique and ensure top quality.

► Tulip Wood

Wunderbars Tulip wood are the original Wunderbars. With a chunky profile of 33mm x 57mm and with a straight grained hardwood, a character of Tulip Wood, these bars are available up to 48" without the need for cross bars. Available in boxes of four.
